## EDUCATION

**Arizona State University, B.S. in Computer Science (GPA: 4.0, 3× Dean's List)**

**Expected May 2028**

**Relevant Coursework:** Data Structures & Algorithms, Applied Linear Algebra\*, Theory of Computation\*, Discrete Math, Calculus III, OOP & Data Structures, Software Engineering (\*in progress)

**Awards:** 4× Hackathon Winner (Best Hardware Hack SunHacks '24, 2nd Place DevHacks '25), 5× SUN Awards for Service & Leadership, Grace Hopper Celebration Scholar 2025

**Member:** Society of Women Engineers, Women in Computer Science, Girls Who Code, Rewriting the Code, FACE, CodePath

## TECHNICAL SKILLS

**GenAI & Agents:** Agentic Architectures, LLM Orchestration, RAG, Vector Embeddings, MCP & Tool Calling, Multi-Agent Systems, Human & Automated LLM Evals, Guardrails, Prompt Engineering, LangChain

**Models & ML:** Claude, GPT, Gemini, Llama 3.3, PyTorch, TensorFlow, scikit-learn, Hugging Face, Pandas, NumPy

**Languages & Backend:** Python, TypeScript, JavaScript, Java, C++, SQL, FastAPI, Flask, React, Next.js, REST APIs, WebSocket

**Cloud & MLOps:** AWS, Azure AI, GCP, Docker, Kubernetes, CI/CD, Snowflake, MongoDB, Cloudflare Workers AI, Git, Linux

**AI-Native Dev Tools:** Claude Code, Cursor, Codex, GitHub Copilot

## EXPERIENCE

**AI Engineering Co-op, Precisely Software** | Burlington, MA

**Jun 2026 – Present**

- Cut talent assessment prep from **5 days** to **under 10 minutes** per query by architecting a production **agentic RAG system** on Claude that retrieves across **7 enterprise data sources** (Jira, Snowflake, Tableau, Cornerstone, UKG, Glassdoor, Git)
- Automated 9-box talent scoring by building the end-to-end pipeline: nightly data ingestion and processing, LLM orchestration, and a **FastAPI** service with a React front end
- Deployed to **production on Azure AI** in a **10-week** cycle by gathering requirements from **6 data owners** and owning the system from prototype to launch

**Agentic Engineer, Enterprise Technology, Arizona State University** | Tempe, AZ

**Aug 2026 – Present**

- Ship features and defect fixes in enterprise codebases with an **agentic AI-first workflow** (Claude Code, Cursor) for code generation, automated testing and documentation
- Support reliability of AWS-hosted platforms across REST APIs, data pipelines, CI/CD and infrastructure-as-code, from pull requests and code review to monitoring and incident response

**QA Engineer, EdPlus, Arizona State University** | Scottsdale, AZ

**Mar 2026 – Present**

- Isolated **290+ defects** across **250+** student-facing modules before production by building AI-assisted validation pipelines in Python

**Software Developer, Barrett Honors College, Arizona State University** | Tempe, AZ

**Aug 2024 – Mar 2026**

- Reduced manual workload by **30%** across **3 ASU** departments by building a Python and React platform that integrates Salesforce, Canvas and AV system APIs

## PROJECTS

**Decoy (2nd Place, DevHacks '25)** | Python, Flask, React, Twilio, OpenAI API

**Sep 2025**

- Reached **93% precision** detecting scam calls in real time by building an agentic pipeline that streams live audio through Twilio into OpenAI models with tool-calling
- Lowered inference latency by **25%** with response caching on a concurrent Flask backend; placed 2nd of **80+** teams in 24 hours

**CollabCode** | TypeScript, React, WebSocket, CRDTs, Cloudflare Durable Objects, Llama 3.3

**Dec 2025**

- Reduced average debug time by **40%** by grounding Llama 3.3 70B in project code history through RAG, using domain-anchored retrieval as a hallucination guardrail
- Achieved **sub-50ms** sync across **10+** concurrent sessions in a distributed system built on Cloudflare Durable Objects and CRDTs

**SignalNote** | React, Python, REST APIs, SQL, Cloudflare Workers AI, KV

**Jan 2026**

- Classified and routed **1,000+** feedback entries at **sub-100ms** inference latency with LLM intent detection on Cloudflare Workers AI, cutting manual triage by **60%**

## LEADERSHIP

**Co-Founder & VP, AWS Student Builders Club, ASU**

**Aug 2026 – Present**

**VP of Operations, The AI Society, ASU (5,000+ members)**

**Aug 2024 – Present**

- Grew reach **12×** by owning end-to-end operations for a **39-member** cross-functional team across marketing, events and partnerships

**Campus Ambassador, Adobe & Perplexity**

**Aug 2025 – Present**

- Drove AI tool adoption among **200+** students through hands-on technical demos and relayed product feedback to engineering teams
