EDUCATION

Arizona State University, B.S. in Computer Science (GPA: 4.0, 3× Dean's List) **Expected May 2028**

Relevant Coursework: Software Engineering, Human-Computer Interaction*, Computing Ethics*, Data Structures & Algorithms, Macroeconomic Principles, Public Service & Policy (*in progress)

Awards: 4× Hackathon Winner (Best Hardware Hack SunHacks '24, 2nd Place DevHacks '25), 5× SUN Awards for Service & Leadership, Grace Hopper Celebration Scholar 2025

Member: Society of Women Engineers, Women in Computer Science, Girls Who Code, Rewriting the Code, FACE, CodePath

TECHNICAL SKILLS

Product: Customer Discovery, User Research, Requirements & Use Cases, Roadmapping, Prioritization, Prototyping, Launch & Iteration, Product Metrics, Agile/Scrum

AI: LLM Agents, RAG, MCP, LLM Evals, Prompt Engineering, Claude, GPT, Gemini, Llama, Claude Code, Cursor, Codex, Lovable

Technical & Data: Python, SQL, TypeScript, React, FastAPI, REST APIs, AWS, Azure, Snowflake, Tableau, Analytics Dashboards

EXPERIENCE

AI Engineering Co-op, Precisely Software | Burlington, MA **Jun 2026 – Present**

- Turned an ambiguous ask into a launched AI product by running customer discovery with **6 data owners** across Engineering and Customer Support, defining requirements and use cases, and scoping v1
- Cut talent assessment prep from **5 days** to **under 10 minutes** per query, the pilot's success metric, with a RAG-based agent on Claude that unifies **7 enterprise data sources**
- Own the product end to end, from prototype to a **production launch on Azure AI in 10 weeks**, iterating on stakeholder feedback

Agentic Engineer, Enterprise Technology, Arizona State University | Tempe, AZ **Aug 2026 – Present**

- Build enterprise platform features with an **agentic AI-first workflow** and propose AI-driven improvements to the team's delivery process

QA Engineer, EdPlus, Arizona State University | Scottsdale, AZ **Mar 2026 – Present**

- Prevented production incidents by designing SQL-backed dashboards that surface defect trends across review cycles, after isolating **290+ defects** in **250+** modules

Software Developer, Barrett Honors College, Arizona State University | Tempe, AZ **Aug 2024 – Mar 2026**

- Reduced manual workload by **30%** across **3** ASU departments by building a platform that unifies Salesforce, Canvas and AV system data
- Cut help-desk resolution time by **15%** for **600+** users with an analytics dashboard, real-time alerting and automated ticket routing

PROJECTS

SignalNote | React, Python, REST APIs, SQL, Cloudflare Workers AI, KV **Jan 2026**

- Accelerated insight generation **3×** with an internal tool that classifies **1,000+** feedback entries by intent and surfaces sentiment trends and priority scores to inform roadmap decisions

Decoy (2nd Place, DevHacks '25) | Python, Flask, React, Twilio, OpenAI API **Sep 2025**

- Went from concept to launch in 24 hours on a real-time scam-call detector with **93% precision**, presented a live demo to judges and placed 2nd of **80+** teams

WoofCare (EPICS) | React, Node.js, Git **Aug 2024 – May 2025**

- Improved task completion speed by **40%** by redesigning an accessibility-focused platform's legacy UI into modular React components
- Reduced PR review cycles by **25%** by running code reviews, writing shared documentation and mentoring junior contributors

LEADERSHIP

VP of Operations, The AI Society, ASU (5,000+ members) **Aug 2024 – Present**

- Grew reach **12×** by leading a **39-member** cross-functional team across marketing, events and partnerships and building relationships with industry partners

Co-Founder & VP, AWS Student Builders Club, ASU **Aug 2026 – Present**

- Launched a new student community for hands-on cloud building, setting its vision, programming and operations from day one

Campus Ambassador, Adobe & Perplexity **Aug 2025 – Present**

- Drove AI tool adoption among **200+** students by delivering hands-on technical demos and relaying structured product feedback to engineering teams
