EDUCATION

Arizona State University, B.S. in Computer Science (GPA: 4.0, 3× Dean's List) **Expected May 2028**

Relevant Coursework: Data Structures & Algorithms, Software Engineering, OOP & Data Structures, Programming Languages, Theory of Computation*, Discrete Math, Digital Design (*in progress)

Awards: 4× Hackathon Winner (Best Hardware Hack SunHacks '24, 2nd Place DevHacks '25), 5× SUN Awards for Service & Leadership, Grace Hopper Celebration Scholar 2025

Member: Society of Women Engineers, Women in Computer Science, Girls Who Code, Rewriting the Code, FACE, CodePath

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, JavaScript, SQL

Systems & Backend: Distributed Systems, REST APIs, WebSocket, FastAPI, Flask, Node.js, React, Next.js, Unit & Integration Testing (JUnit)

Cloud & Infra: AWS, Azure, GCP, Docker, Kubernetes, CI/CD, Infrastructure-as-Code, Linux, Cloudflare Workers, Monitoring

Data: SQL, MongoDB, Snowflake, Data Pipelines, KV Caching

AI-Native Development: Claude Code, Cursor, Codex, GitHub Copilot, Claude/GPT/Gemini APIs, LLM Agents, MCP, RAG, LLM Evals

EXPERIENCE

Agentic Engineer, Enterprise Technology, Arizona State University | Tempe, AZ **Aug 2026 – Present**

- Ship features and defect fixes in large enterprise codebases with an **agentic AI-first workflow** (Claude Code, Cursor) for code generation, automated testing and documentation
- Contribute to CI/CD pipelines and infrastructure-as-code on AWS and support platform reliability through API maintenance, data pipeline monitoring and incident response

AI Engineering Co-op, Precisely Software | Burlington, MA **Jun 2026 – Present**

- Cut talent assessment prep from **5 days** to **under 10 minutes** per query by building a RAG-based agent on a React and **FastAPI** stack that integrates **7 enterprise data sources**
- Own the system end to end, from automated nightly ingestion to a **production deployment on Azure**, gathering requirements from **6 stakeholders** and shipping in **10 weeks**

QA Engineer, EdPlus, Arizona State University | Scottsdale, AZ **Mar 2026 – Present**

- Isolated **290+ defects** across **250+** student-facing modules before production by writing automated, AI-assisted validation scripts in Python

Software Developer, Barrett Honors College, Arizona State University | Tempe, AZ **Aug 2024 – Mar 2026**

- Reduced manual workload by **30%** across **3 ASU** departments by building a Python and React platform that integrates Salesforce, Canvas and AV system APIs
- Cut help-desk resolution time by **15%** for **600+** users by shipping a SQL-backed dashboard with real-time alerting and automated ticket routing

PROJECTS

CollabCode | TypeScript, React, WebSocket, CRDTs, Cloudflare Durable Objects, Llama 3.3 **Dec 2025**

- Achieved **sub-50ms** state sync across **10+** concurrent sessions by architecting a fault-tolerant **distributed system** on Cloudflare Durable Objects with CRDT conflict resolution, shipped in one week
- Reached **zero concurrency conflicts** under 10+ simultaneous users with a WebSocket layer covered by automated conflict-detection tests

SignalNote | React, Python, REST APIs, SQL, Cloudflare Workers AI, KV **Jan 2026**

- Cut manual data triage by **60%** by designing REST APIs with SQL storage and KV caching that route **1,000+** feedback entries at **sub-100ms** latency

DiscussIQ | Java, JavaFX, JUnit, H2, MVC **Jan 2026 – May 2026**

- Shipped with **0 defect failures** across 4 release phases by writing **120+ JUnit tests** in 5 automated suites using equivalence partitioning and black-box testing

Decoy (2nd Place, DevHacks '25) | Python, Flask, React, Twilio, OpenAI API **Sep 2025**

- Lowered API latency by **25%** with inference-level caching on a concurrent Flask backend processing live call streams; placed 2nd of **80+** teams

LEADERSHIP

Co-Founder & VP, AWS Student Builders Club, ASU **Aug 2026 – Present**

VP of Operations, The AI Society, ASU (5,000+ members) **Aug 2024 – Present**

- Grew reach **12×** by owning end-to-end operations for a **39-member** cross-functional team across marketing, events and partnerships
